### Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

**Claims 1-6, 8-11, and 16-21** rejected under 35 U.S.C. 102(e) as being anticipated by **Hart et al (6,708,897)**. **Hart et al** discloses an evaporative device (1) including a container (26) for holding a liquid, the container having an opening, a porous wick (2) extending through the opening such that a portion of the wick contacts the liquid held in the container and a portion of the wick is exposed to the ambient environment, where the wick transfers the liquid from the container, a nonporous capillary member (18) made of plastic or metal (ie: polyethylene) having a surface in communication with a portion of the wick, capillary passageways are considered the

capillary portion between the plurality of small openings (6) wherein the passageway is in communication with the extended wick portion (2) and are on the surface of the capillary plate. In regards to claim 10, the capillary member is detachable secured to the container (SEE Figures 6a & 6b).

### ***Claim Rejections - 35 USC § 103***

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

**Claims 13 and 14** are rejected under 35 U.S.C. 103(a) as being unpatentable over **Hart et al (6,708,897)**. **Hart et al** discloses the applicants primary inventive concept as stated above but does not specifically recite an evaporate device having plural capillary plates. It would have been obvious at the time the invention was made to a person having ordinary skill in the art to which the subject matter pertains to have modified the evaporate device of Hart et al to accommodate multiple capillary plates sine it has been held that mere duplication of the essential working parts of a device involves only routine skill in the art.

***Allowable Subject Matter***

**Claims 12, 15, 22 and 23** are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
